Client/Matter No.: M1015.70066TJO****REMARKS**

Claims 13-18, 20-29, 35-36, and 39-43 are pending in the application. The amendments to claims 20, 29, and 35 are made for minor grammatical changes. Support for the newly added claim 42 can be found in claim 19, which has been set forth in an independent claim format. Newly added claim 43 finds support in claim 34, which has been set forth in independent claim format. No new matter has been inserted into the application.

Rejection Under 35 U.S.C. §112, Second Paragraph

Claims 13-21, 32-36 have been rejected under 35 U.S.C. §112, second paragraph, as being indefinite. Applicants traverse this rejection. Reconsideration and withdrawal thereof are respectfully requested.

The Examiner has indicated that the phrase "the first article being immobilized relative to a signaling entity that is immobilized relative to a binding partner" is indefinite. Applicants fail to see how this phrase is indefinite and would like further clarification as to the reason for the rejection. The sequence of binding is clear. The first article is immobilized relative to a signaling entity by linking through a binding partner to the signaling entity. The recited phrase appears to be definite in describing such a molecular arrangement. Therefore, Applicants respectfully request the Examiner to withdraw this rejection.

Examiner has also rejected claim 32 for being indefinite. However, claim 32 has been canceled. Therefore, this rejection has been overcome.
